Helcim
Calgary, AB

Dear Hiring Manager,

Re: Junior Full Stack Developer

I am excited to apply for the Junior Full Stack Developer position at Helcim. With my strong passion for coding, continuous learning mindset, and problem-solving skills, I believe I would be a valuable addition to your team and contribute to the development of the next generation of payments technology.

In my current role as a Software Engineer at Chargebacks911, I have gained experience in maintaining and enhancing automatic processors using Python, troubleshooting UI issues with Selenium, and optimizing SQL queries for improved data processing. These skills align closely with the responsibilities mentioned in the job description, such as architecting scalable systems, improving existing systems through PHP maintenance, and building reactive UIs with JavaScript frameworks.

During my tenure at Cynopsis Solutions, I worked as a Full-stack Developer, where I maintained and optimized the eKYC platform using ExpressJS and GraphQL, ensuring high performance and scalability for multiple clients. I also played a key role in developing a new version of the platform using Django, implementing scalable RESTful APIs and applying design patterns for enhanced system architecture.

At Oursky Limited, I gained experience in website development using React and Bootstrap, as well as building and managing automated deployment processes to AWS using Docker and Kubernetes. These skills in front-end development, deployment, and infrastructure management will enable me to contribute effectively to Helcim's ongoing and new projects.

Throughout my career, I have actively participated in code reviews, provided constructive feedback, and embraced collaboration, resulting in improved code quality and reduced bug occurrences. I am confident that my experience and technical expertise make me a strong fit for the collaborative and fast-paced environment at Helcim.

I am excited about the opportunity to join Helcim and contribute to the growth and success of your organization. Thank you for considering my application. I look forward to the possibility of discussing how my skills and experience align with your needs further.

Sincerely,
Hieu Tran
