EMPLOYMENT

Danihel Group

Alberta, Canada

Full Stack Developer

Dec 2023 – Aug 2026

- Owned end-to-end delivery of features across backend services and frontend UI on a Risk and Disputes Management System serving ~1,700 active users and ~43,000 active orders.
- Modernized backend architecture by migrating the mobile app's API integration to a Node.js service, deploying across a service-oriented architecture spanning mobile and web clients.
- Built a database-backed job-tracking system adopted across ~15 automated workflows, designed as a shared capability for other teams to build on.
- Strengthened application security by standardizing permission headers, centralizing auth error handling, and auditing token anomalies across ~5 million scan records.

Cynopsis Solutions

Singapore

Full-stack Developer

Sep 2020 – Mar 2022

- Designed and built a new version of the eKYC platform using Django, architecting a multi-tenant database structure and scalable, reactive RESTful APIs.
- Collaborated cross-functionally with clients and internal teams during onboarding, translating business needs into technical solutions for 45 enterprise clients.
- Maintained and optimized backend services using ExpressJS and GraphQL, ensuring high performance and scalability.
- Designed and managed an automated AWS CodePipeline deployment process, cutting deployment time by 50%.

Oursky Limited

Hong Kong

Full-stack Developer

Jan 2020 – Aug 2020

- Built user-facing web components using React, translating designs and wireframes into production-quality, responsive code.
- Developed Django RESTful APIs and integrated API data into front-end applications.
- Mentored through code reviews and pull request feedback, contributing to a 20% reduction in bug occurrences and improved team collaboration.
- Managed release and deployment processes to AWS using Docker and Kubernetes.

Construct Digital

Singapore

Full-stack Web Developer

Aug 2016 – Jan 2020

- Led code reviews, mentored teammates through pull requests, and resolved conflicts, improving collaboration and code quality across the team.
- Built WordPress themes and backend integrations from scratch using PHP, optimizing assets for a 3-second load time and 85+ Google PageSpeed score.
- Developed reusable components in Vue, improving code maintainability and cutting development time by 30%.

SKILLS

- Backend: Python, Django, Node.js, ExpressJS, PHP, Laravel, RESTful APIs, GraphQL
- Frontend: React, Angular, Vue, TypeScript, JavaScript, HTML, CSS/Sass
- Practices: End-to-end feature ownership, service-oriented architecture, code review & mentoring, cross-functional collaboration
- Databases: PostgreSQL, MySQL
- DevOps / CI/CD: Git, Docker, AWS, aws-cdk, Jenkins

EDUCATION

Ho Chi Minh City University of Technology

Bachelor of Engineering in Computer Science

Awarded in 2017
