EMPLOYMENT

Danihel Group

Alberta, Canada

Full Stack Developer

Dec 2023 – Aug 2026

- Owned features end-to-end from design through production, including API design, background jobs, and frontend delivery, for a platform serving ~1,700 active users and ~43,000 active orders.
- Debugged and resolved production performance issues on high-traffic endpoints by introducing database indexing, rewriting inefficient ORM queries, and decoupling synchronous logging from the request path.
- Modernized backend architecture and API design by migrating the mobile app's integration to a Node.js service, improving reliability for end users.
- Strengthened application security by standardizing permission headers, centralizing auth error handling, and auditing token anomalies across ~5 million scan records.

Cynopsis Solutions

Singapore

Full-stack Developer

Sep 2020 – Mar 2022

- Designed and built a new version of the eKYC platform end-to-end using Python (Django), architecting a multi-tenant database structure and scalable RESTful APIs.
- Adjusted the UI and implemented state management in Angular, resulting in a 10% increase in user engagement.
- Collaborated directly with clients during onboarding, translating real customer needs into technical solutions for 45 enterprise clients.
- Designed and managed an automated AWS CodePipeline deployment process, cutting deployment time by 50%.

Oursky Limited

Hong Kong

Full-stack Developer

Jan 2020 – Aug 2020

- Built React-based front-end applications and Django RESTful APIs, translating designs and wireframes into production-quality code.
- Integrated third-party API data into front-end applications, working closely with backend services.
- Conducted code reviews and pull request feedback, contributing to a 20% reduction in bug occurrences.
- Managed release and deployment processes to AWS using Docker and Kubernetes.

Construct Digital

Singapore

Full-stack Web Developer

Aug 2016 – Jan 2020

- Built reusable, maintainable UI components in Vue, cutting development time by 30%.
- Optimized frontend performance and asset delivery (Webpack), achieving a 3-second load time and 85+ Google PageSpeed score.
- Conducted code reviews, managed pull requests, and resolved conflicts, improving collaboration and code quality across the team.

SKILLS

- Frontend: React, TypeScript, JavaScript, Angular, Vue, HTML, CSS/Sass
- Backend: Python, Django, Node.js, ExpressJS, RESTful APIs, GraphQL
- Databases: PostgreSQL, MySQL, data modeling, query optimization, indexing
- Practices: End-to-end feature ownership, production debugging & reliability, code review, cross-functional collaboration
- Cloud / DevOps: AWS, aws-cdk, Docker, Kubernetes, Git, Jenkins, CI/CD
- AI-Assisted Development: Daily use of AI coding tools (Gemini, Claude Code) to accelerate writing, testing, and reviewing production code

EDUCATION

Ho Chi Minh City University of Technology

Bachelor of Engineering in Computer Science

Awarded in 2017
