EMPLOYMENT

Full Stack Developer - Danihel Group

Alberta, Canada

Dec 2023 – Aug 2026

- Owned authentication and access-control systems end-to-end, standardizing permission headers, centralizing auth error handling, and auditing token anomalies across ~5 million scan records on a platform serving ~1,700 active users.
- Strengthened account access reliability by resolving credential-caching defects and broken authentication flows, directly improving login and session integrity for end users.
- Implemented role-based access controls (RBAC) for pricing edits and scheduling permissions, preventing unauthorized actions across ~1,650 technicians.
- Modernized backend architecture by migrating the mobile app's API integration to a Node.js service, improving reliability and maintainability of the surrounding system.

Full-stack Developer - Cynopsis Solutions

Singapore

Sep 2020 – Mar 2022

- Designed and built a new version of a regulated identity-verification (eKYC) platform using Django, architecting a multi-tenant database structure and scalable RESTful APIs.
- Maintained and optimized backend services using ExpressJS and GraphQL, ensuring high performance, reliability, and scalability for 45 enterprise clients.
- Adjusted the UI and implemented state management techniques in Angular, resulting in a 10% increase in user engagement.
- Designed and managed an automated AWS CodePipeline deployment process, cutting deployment time by 50%.

Full-stack Developer - Oursky Limited

Hong Kong

Jan 2020 – Aug 2020

- Built React-based front-end applications and Django RESTful APIs, delivering production-quality end-to-end features.
- Managed release and deployment processes to AWS using Docker and Kubernetes.
- Conducted code reviews and pull request feedback, contributing to a 20% reduction in bug occurrences.
- Extended a Wagtail CRM backend to support structured content management.

Full-stack Web Developer - Construct Digital

Singapore

Aug 2016 – Jan 2020

- Built reusable, maintainable UI components in Vue, cutting development time by 30%.
- Optimized frontend performance and asset delivery (Webpack), achieving a 3-second load time and 85+ Google PageSpeed score.
- Conducted code reviews, managed pull requests, and resolved conflicts, improving collaboration and code quality across the team.

SKILLS

- Identity & Access Management: Authentication & authorization flows, permission/access control design, token/session management, auth error handling, anomaly auditing
- Frontend: React, TypeScript, JavaScript, Angular, Vue, HTML, CSS/Sass
- Backend: Python, Django, Node.js, ExpressJS, RESTful APIs, GraphQL
- Databases: PostgreSQL, MySQL, DB2
- Practices: Production reliability & uptime support, cross-functional collaboration with product/security stakeholders, code review
- DevOps / CI/CD: Git, Docker, AWS, aws-cdk, Jenkins

EDUCATION

Ho Chi Minh City University of Technology

Bachelor of Engineering in Computer Science

Awarded in 2017
